

Project Narrative

Project Title: Hostel Attendance using barcode on ID card.

Project Summary and Overall Approach:

- This software will allow students to mark their attendance in hostel just by scanning their ID card.
- It will make the data more organized and easier to read.
- The leave register will not be required anymore.
- At a later stage we also plan to deploy it to lecture theatres, classrooms and labs.
- This software will save time and manual labor.
- This software is very cost effective as there is only one barcode reader required for a particular building.

Responsibility of Team Members:

Yash Raj Pandey: -

Gather all the related information from all the stakeholders (Example, students, alumnus).

analyze the requirement and prepare a well-defined requirement set. Also oversee all the other operations.

Samarth Dubey: -

Gather all the related information from all the stakeholders (Example, students, alumnus).

analyze the requirement and prepare a well-defined requirement set. Also oversee all the other operations.

Aryman Tripathi: -

Gather all the related information from all the stakeholders (Example, students, alumnus).

analyze the requirement and prepare a well-defined requirement set. Also oversee all the other operations.
